

Lab07 Exercises

❖ Lab07.5. Student management in JTable

Implement an application in Java to input a student information to a table.

*** Using Jtable and BorderLayout

Student Management

First name

Last name

Age

Major

Add new

First name	Last name	Age	Major
AA	Tola	21	IT
AA	Makara	19	IT
AA	Tola	21	IT
AA	Makara	19	IT
AA	Tola	21	IT
AA	Makara	19	IT
AA	Tola	21	IT
AA	Makara	19	IT

Create Jtable with header and row data

```
// Initial table header
DefaultTableModel header = new DefaultTableModel();
header.addColumn("First name");
header.addColumn("Last name");
header.addColumn("Age");
header.addColumn("Major");

// Initializing the JTable
JTable j = new JTable(header);
DefaultTableModel model = (DefaultTableModel) j.getModel();
model.addRow(new Object[]{ "AA", "Tola", "21", "IT" });
model.addRow(new Object[]{ "AA", "Makara", "19", "IT" });
```
