Lab05 Exercises

❖ Lab05.2. Multi deletion

Write a program to allow user to *infinitely input student into* a table and delete many at once.
You can suggest Attributes (id, name, age, etc.)

Console:

```
==== Menu ===
1.   Add new students
2.   Delete multiple students
3.   Quit
Choose an opt: 1

Student #1:
Id: 111
Name: Tola
Age: 17

Do you want to add more (y/n)?: y
Student #2:
Id: 222
Name: Makara
Age: 16

Do you want to add more (y/n)?: y
Student #3:
Id: 333
Name: Kompheak
Age: 25

Do you want to add more (y/n)?: n
```

Console:

```
==== Menu ===
1.   Add new students
2.   Delete multiple students
3.   Quit
Choose an opt: 2

=============================================================
| No        | ID        | Name                  | Age       |
=============================================================
| 1         | 111       | Tola                  | 17        |
| 2         | 222       | Makara                | 16        |
| 3         | 333       | Kompheak              | 25        |
=============================================================
==== DELETION =====
Input student #1 ID: 111
Do you want to delete more (y/n)?: y
Input student #2 ID: 444
Do you want to delete more (y/n)?: y
Input student #3 ID: 222
Do you want to delete more (y/n)?: n

Student with ID 111 deleted
Student with ID 444 not found!
Student with ID 222 deleted
```
