Lab04 Exercises

❖ Lab04.2. Student management without using ArrayList

Write a program to allow user mange a list of student by using normal Array not ArrayList.
You can suggest Attributes (id, name, age, etc.)

Console:

```
==== Menu ===
1.  View all students
2.  Add a new student
3.  Delete a student
4.  Quit
Choose an option: 3

==== Delete a student ====
Input student ID: 11111
The following student has been deleted.
| 1       | 111     | Tola    | 17      |
```

Console:

```
==== Menu ===
1.  View all students
2.  Add a new student
3.  Delete a student
4.  Quit
Choose an option: 3

==== Delete a student ====
Input student ID: 2345
Student is not found. Try again
Input student ID: 3456
```
